Please Bring your Town Report to Town Meeting

IMPORTANT

All Taxpayers should read the following and comply with it:
Section 70, Chapter 13, Revised Statutes of Maine, 1930:

Amended Chapter 180, 1933

Assessors to give notice to bring in lists of taxable property; if no lists are brought in, no claim for abatement. Before making an assessment, the assessors shall give seasonable notice in writing to the inhabitants by posting notifications in some public place in the town, or shall notify them, in such other way as the town at its annual meeting directs, to make and bring in to them true and perfect lists of their polls and all their estates real and personal, not by law exempt from taxation, of which they were possessed on the 1st day of April of the same year. If any resident owner after such notice, or any non-resident owner after being reasonably requested thereto by the assessors, does not bring in such list, he is thereby barred of his right to make application to the assessors or the county commissioners for any abatement of his taxes, unless he offers such list with his application and satisfies them that he was unable to offer it at the time appointed. The request upon non-resident owners may be proved by a notice sent by mail directed to the last known address of the taxpayer or given by any other method that brings notice home to the taxpayer.

DEMANDS ON TAXPAYERS

With the world conditions as they are at present the citizens of our community will be called upon more and more to give of their time, possessions, and even their lives to the cause of War.

Our front line of defense is in our own town. Please coöperate with our local defense board at every opportunity and if the emergency does arise here, we can feel that we have done all that was possible toward establishing freedom and unity for all.

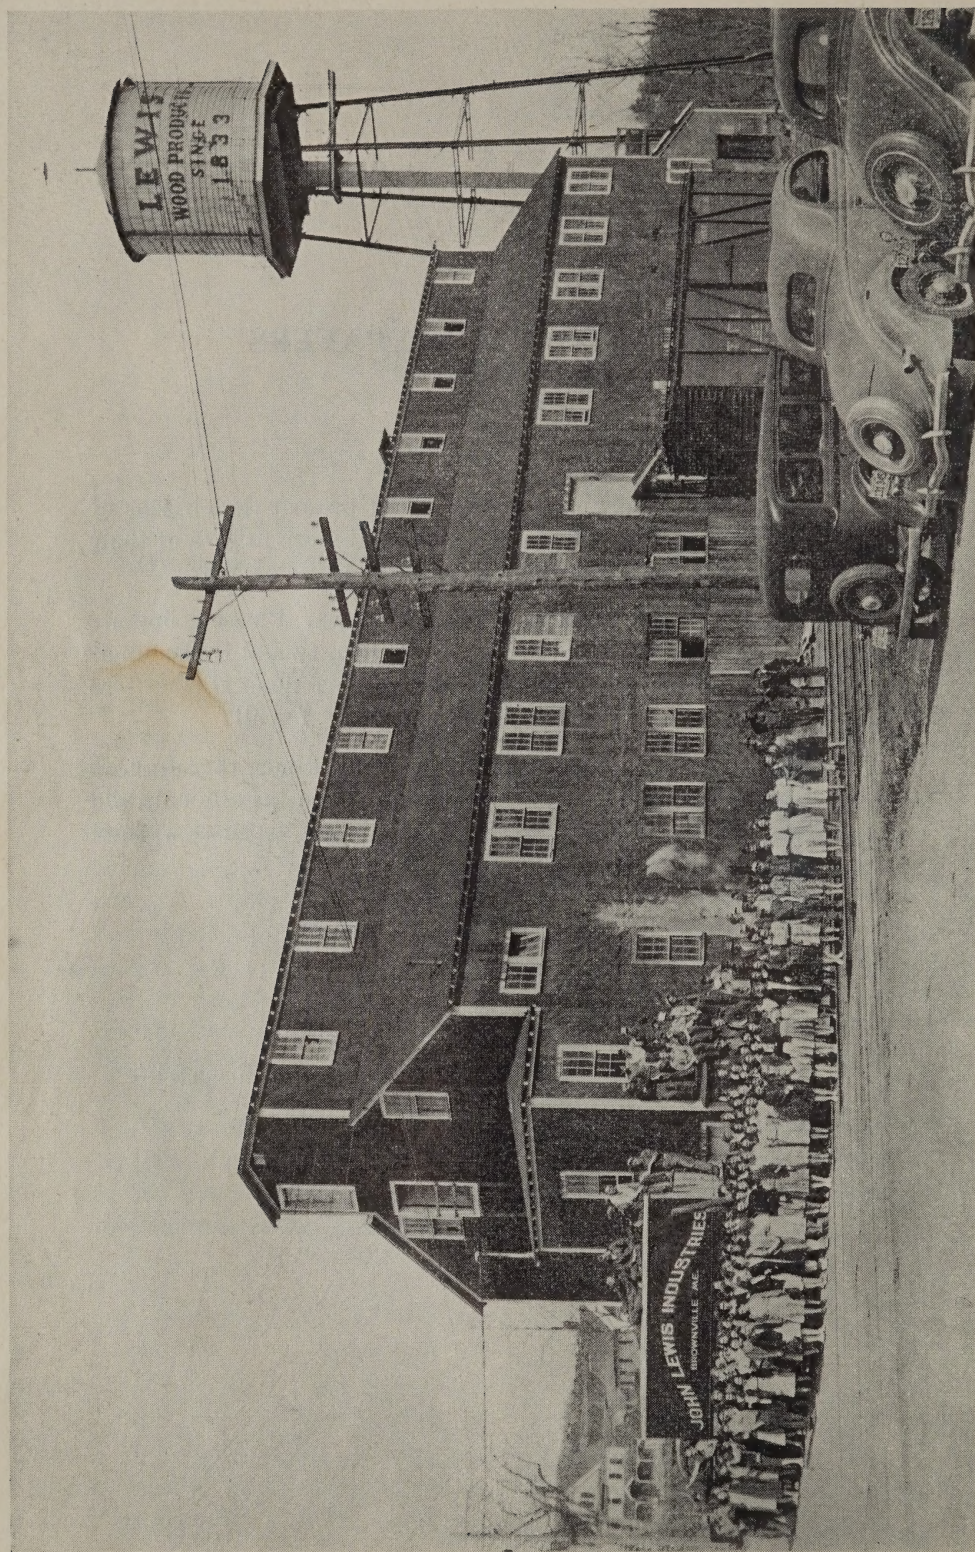

We know it will be hard to pay taxes of all kinds, therefore, to make it easier we urge that town taxes be paid in installments and in this way it will help the town to pay necessary expenses without interruption and keep avoidable expenses down.

REPORT OF SUPERINTENDENT OF SCHOOLS

To the Board of Education and Citizens of Brownville, I hereby submit my sixth and last annual report on the public schools of Brownville:

PERSONNEL

Halbert Stevens, Maine School of Commerce, Brownville Junction High School, Commercial Teacher and Coach.

Ruth Beal, Bates College, English and Social Science, Brownville Junction High School.

Leon Strout, Farmington Normal School, Brownville Junction Grammar School, Grade 8, Principal.

Olive Chick, Gorham, University of Maine, Grade 7, Brownville Junction Grammar School.

Doris Howard, Presque Isle Normal School, Acadia University, Nova Scotia, Brownville Junction Grammar School, Grade 5.

Larson Kelley, University of Maine, Brownville High School, Principal, and Mathematics and Science.

Bernadette Nedeau, Regis College, Brownville High School, Commercial Teacher and Girls' Athletics.

Verna McLaughlin, Aroostook State Normal School, Brownville Primary School.

There have been 482 pupils registered in Brownville Public Schools during the current school year, distributed as follows:

Brownville Junction High School,	105
Brownville High School,	39
Brownville Junction Grammar School,	131
Brownville Junction Primary,	100
Brownville Grades,	107
<hr/>	
Total,	482

BUILDINGS

The chief expenditure for building maintenance this year was for repairs at the Brownville Primary Building. This building had not had any work done on it for many years. It was thoroughly scraped, and given two coats of paint. The long set of steps leading up to the entrances had rotted away. Because of design, the water and ice from the roof in the center front of the building was destroying the foundation and lower wall of the main building. We were able to overcome this condition, and eliminate considerable hazard for the children, by doing away with the center entrance and the platform leading to it. We also found, in the course of work at the building, that the chimney which had been put up of cement brick had worn away so that in places it was not more than a half-inch thick. This chimney has been rebuilt with high grade brick from a point three feet below the roof.

New grates were installed in the furnace at Brownville Junction High School.

HIGH SCHOOLS

Both high schools have operated during the year past without major changes in curriculum or in activities.

At Brownville Junction, Mr. Dunfee has offered a new course in practical Science. A small group of Senior students has spe-

cialized in the field of electricity. They have done a great deal of work in radio. All of their apparatus has been made at the school from parts purchased through a supply house. I understand that as a result of this course, several of these students plan to make radio their life work. This has been a project of vocational nature suitable for a small school without very much in the way of physical resources. Mr. Dunfee deserves a great deal of credit for this special work.

This school received recognition by being invited to put on a demonstration at the State Teachers' Convention.

At Brownville High School, we regret the loss of Mr. Raymond. Pupils and citizens of Brownville respected Mr. Raymond and admired his work during the year of his service in the school. We wish him every success and advancement with the armed forces. I wish to here pay a tribute to Miss Murray who has been a faithful worker in the interests of Brownville High School. She has "stood by through thick and thin," and deserves our full appreciation and gratitude for her loyal service.

ELEMENTARY SCHOOLS

Pupil progress in the elementary schools has, in general, been very satisfactory. I make this statement in spite of the fact that nearly a quarter of a year of school was lost to a majority of pupils during the past twelve months due to various epidemics. Some really outstanding work can be found in the grades in Brownville. Outstanding work is the product of outstanding teachers plus good working materials.

LOOKING BACK

As I think back through the years that I have worked in and for the town of Brownville, of my relations with its pupils, its people, and its teachers, and breaking of the many ties is very difficult. Brownville has been good to me.

I hope that I have, in some measure at least, been worthy of the responsibilities that have been entrusted to me.

As I conclude my service, I believe I am justified in recalling some of the ways wherein the schools have improved. I believe that real advancement has been made in both the elementary and secondary schools. In the elementary schools, added materials of teaching in the hands of zealous, loyal teachers, have stepped up our achievement particularly in reading and allied subjects by at least a half year. In many instances, I believe this progress is a full year and more. The high school program is broader and stronger. Visual education has been introduced. The permanent record system is valuable.

Physical conditions within the building are improved. New lighting has been installed in eight (8) rooms. Shower baths have been put into both large buildings. One new room has been built. More than half of the classrooms have been refinished as have been more than half of the desks. The new transportation unit is a fine piece of equipment. In the light of recent events, we were indeed fortunate to have made this purchase during the past year.

LOOKING AHEAD

While I have mentioned improvements that have been made during recent years, there is still much to be done.

The repairs and insurance account of past years has not been adequate to maintain the school plants. The roof on the large building at Brownville Junction must be replaced. The village building should be painted. The interior of the primary building needs to be refinished throughout. Toilet facilities in all of the buildings are unsatisfactory. These basement rooms should be tiled, and modern sanitary fixtures installed. Both gymnasiums need seating equipment. The lighting in both gymnasiums should be changed, both from the point of view of service and of safety.

The citizens of Brownville must arrange for an increase in teachers' salaries. With present salary levels, Brownville cannot

hope to maintain a strong staff of teachers. The law of supply and demand is operating. Other communities are voting substantial salary raises. Competitors have already acted. You, too, must act. Your teachers make your schools. A real shortage of experienced teachers is here. It will be more acute next fall. Your committee must have sufficient funds at its disposal to meet this new situation.

In the not too distant future, citizens of Brownville should give consideration to an improved program of health and physical education. It is a national goal in the present, and will continue to be in the future. This program should include the employment of a physical education instructor. It should further include increased service of a school physician, school nurse, and provisions for a dental clinic. A full course noon lunch program is also needed.

Citizens, I sincerely believe that the efficiency of your entire school organization could be improved materially if you would give their Board of Education the authority to make such combinations of school facilities as would offer advantages educationally and economically.

To my many friends in Brownville; pupils, graduates, social and business associates, I wish to express my sincere appreciation and to extend my best wishes for the future.

Respectfully submitted,

H. A. LADD,

Superintendent.

ANNUAL REPORT OF PUBLIC HEALTH NURSING, 1941

To impress upon the parents that good health habits develop in very early childhood, home visits were made. The importance of early recognition through periodic health examinations of beginning defects and diseases was stressed. Vaccination against smallpox and immunization against diphtheria was urged. The nurse gave help to mothers by reading over available literature on infant and preschool care, giving explanations when necessary.

Some visits to prenatal patients were made at the request of the attending physician, while others were made urging them to secure medical supervision. Visit schedules and instructions were made according to the individual needs of the patient. Much emphasis was placed on diet in relation to comfort and safety.

Child health conferences are planned for spring and it is to be hoped that they will be more successful than those in the past.

ELEANOR GRIFFITHS,

Public Health Nurse.

REPORT OF PUBLIC HEALTH NURSE

To the Selectmen and Citizens of Brownville:

I hereby submit the annual report of the health service tendered Brownville for the year beginning January 1, 1941, and ending December 31, 1941.

The service covers the health problems of all age groups, follow-up of crippled children, and the prevention, diagnosis, and treatment of tuberculosis.

The school nursing report shows that the number of children weighed and measured by the nurse was 453, teeth defects numbered 233, vision defects 13, and throat defects 119. Corrections made since the last inspection number only 4 for throat abnormalities, and 7 children indicated they had been to a dentist for treatment. Some community plan should be worked out to have some necessary corrections made on throat and teeth conditions.

Almost every month of the year showed that the nurse was called in to work out some special health problem. In February the nurse made a special inspection of 494 pupils looking for symptoms of scarlet fever. She also made some social investigating visits.

In March a further check-up of 716 children was made. In April the nurse was called to Brownville Junction to again check on scarlet fever. There were 397 children inspected. As April was Early Diagnosis Campaign month, literature consisting of posters and pamphlets and other informative material was provided for the town.

In May the nurse made the routine check-up of 319 children. This was the regular annual inspection. In September the nurse assisted the school physician, Dr. Lyon, in making the usual annual examination of 204 children. The nurse inspected 131 children. Some social investigating was done with crippled children.

In October again the nurse assisted the doctor in making inspection of the children and made a nursing inspection of 324 pupils. In November field visits were made to homes of children to talk over health problems. During this month arrangements were made for one child to have necessary glasses. Some re-examinations were made of children for symptoms of whooping cough.

Other types of activities for the year included regular follow-up of crippled children to determine the need for further check-up at the clinic, and some social service investigation was done on request of individuals. Two children were admitted to the Children's Hospital in Portland. The nurse assisted with the necessary arrangements. The nurse held conferences with teachers, the superintendent of schools, and individuals, for the purpose of rendering aid to the children.

In the Grammar school 8 children qualified for the Seven Point Pin and Certificate. Six children in the Primary school received the award, and 8 pupils in the Village school were eligible for the Seven Point award.

Appreciation is extended to the Superintendent of Schools, teachers, and citizens for their coöperation.

Respectfully submitted,

PISCATAQUIS COUNTY NURSING SERVICE

By NELLIE R. GIBBONS, R. N.,

Public Health Nurse.

REPORT OF FIRE WARDS

BROWNVILLE JUNCTION

To the Selectmen and Citizens of the Town of Brownville, Maine:

As Fire ward of Brownville Junction, I wish to submit the following report.

During the year I have made thirty-five inspections. Of this number, ten have had to have repairs made. Copies of inspection and work done are on file with the Town Clerk.

I also issued three permits to keep and transport explosives and the copies of these permits are also in the office of the Town Clerk.

In closing I wish to add that we have had no fires calling for insurance claims during the year.

Respectfully submitted,

J. D. MACKENZIE,

Fire Ward of Brownville Junction.
